* Maximum allowed load at a temperature of +21 °C (+70 °F) and fixing with Walraven starQuick® nut M6 + M6 steel threaded rod. The values are recommended values and based on our nowadays technical knowledge, experience and statements in the literature as well as testing under laboratory circumstances. They do not relieve the user of own testing of the end product due to the big number of parameter of influence in the mounting process and the application. A legal confirmed assurance of properties or the suitability for a specific application cannot be based on our specifications.
