

Walraven Yeti® 335

Technical Data Sheet

All internal tests were conducted using the Walraven RapidStrut® 41|H channel type. The test results were evaluated in accordance with the STEP method, as outlined in the RAL GZ-655:2008 guideline. The recommended load values presented in this data sheet are based on actual tests and are further supported by the manufacturer's extensive experience with previously installed projects.

Articlecode	Description	Total Width (mm)	Total Length (mm)	Total Height (mm)	Height 2 channel base (mm)	Effective area A_{eff} [m ²]	Weight [kg]
67685201	Walraven Yeti® 335	335,3	335,3	95,9	12,5	0,090	1,27

	Standing on concrete	Standing on styrodur 4000 CS, ds	Standing on EPS DAA dm
Characteristic resistance R_k [kN]	22,31	10,64	8,46
Recommended Load F [kN]	11,15	5,32	2,70

The recommended Load [kN] is calculated by applying a safety factor of 1.4 for static load considerations, 1.1 for potential material variations, and 1.3 for empirical data usage, resulting in a total factor of $\gamma=2.0$.

The recommended Load [kN] also considers the long-term maximum compression force permitted for the type of insulation, based on the manufacturer's technical data.

Sound reduction and UV-resistance impact

Sound & vibration proof

With non-slip anti-vibration mat.

Type of foot	Load per foot	Insulation type	Sound reduction acc. EN ISO 717-2
Yeti® 335	100 kg	without	$\Delta L_w = 22$ dB
Yeti® 335	100 kg	EPS DAA dm	$\Delta L_w = 29$ dB
Yeti® 335	200 kg	EPS DAA dm	$\Delta L_w = 29$ dB
Yeti® 335	300 kg	EPS DAA dm	$\Delta L_w = 30$ dB
